

Protect your brands.
Protect your consumers.

PIONEERING DIAGNOSTICS

Stay in control with rapid, reliable testing solutions.

In a competitive global market, manufacturers of processed foods are faced with the challenges of ensuring product safety and quality while improving operational efficiency. Whether your company produces ready-to-eat meals, confectionary products, snacks, or other processed foods, you want microbiological testing solutions you can count on for every stage of production. bioMérieux offers a comprehensive selection of diagnostic solutions to deliver the rapid, accurate results you need to maximize productivity and shelf life.

SAFEGUARD BRAND INTEGRITY.

Consumers trust ready-to-eat foods to be safe and free of pathogens like salmonella, molds, yeasts, and other contaminants. With so many components coming together, food production systems are prone to errors and exposed to risks of microbiological contamination. Managing complex manufacturing processes requires constant vigilance and efficiency to keep products on shelves and improve profitability. With results in as little as 24 hours, bioMérieux's rapid, automated diagnostic solutions deliver the timely, accurate, and traceable results you need to stay in compliance and protect brand integrity.

ACCURATE

- Ensure product safety
- Identify issues efficiently
- Protect consumers

RAPID

- Pinpoint production problems
- Make decisions faster
- Extend product shelf life

STREAMLINED

- Eliminate error potential
- Ensure data traceability
- Increase productivity

REDUCE COSTS AND BOOST PRODUCTIVITY.

Getting your product on shelves as quickly as possible helps lower inventory housing costs, extend shelf life, and reduce waste. To make that happen, you have to minimize the risk of microbiological contamination. Effective quality-control systems must test throughout every stage of production—reliably monitoring raw materials, packing and production environments, as well as in-process and final products. Our streamlined solutions provide valuable insights to enable faster decisions and corrective actions all along the way, so you can release products sooner.

UNLOCK VALUE WITH A STREAMLINED WORKFLOW.

Quality-control testing takes time, training, and labor. We help you minimize all three with intuitive interfaces that require no more than three steps to complete. All of our tests are internationally validated and feature a streamlined workflow to help your lab deliver fast, accurate results while realizing significant savings.

SAFE, EASY INFORMATION MANAGEMENT.

Our fully automated diagnostic solutions help you handle complex situations inherent to an international regulatory landscape—such as multi-site management, complex value chains, and dealing with worldwide organizations. bioMérieux solutions feature efficient data management capabilities that provide full traceability to meet industry demands and stay in compliance.

CUSTOM SOLUTIONS AND WORLD-CLASS SUPPORT.

Every lab and every production plant is different. Our team of microbiology experts specializes in creating customized solutions to meet your facility's unique needs. We also provide world-class, professional support to make sure your quality-control solutions are keeping your business at its best.

GET THE RIGHT SOLUTION FOR YOUR LAB.
